exercise testing, 269–276, 277
health beliefs and, 130–135
lipid-lowering therapy, 220–233
pilots and, 383–384
progression of, 386–388
retirement and, 383–384
risk factors of, 234–238, 383–384, 386–388
Creatine Kinase
isometric exercise, 451–457

Dyskinemia
hyperventilation,
Dysrhythmia
electrocardiographic monitoring, 342–345
physicians and, 342–345

Echocardiography
left ventricular function, 278–284
Electrocardiographic Monitoring
dysrhythmia, 342–345
obesity and, 358–364
physicians and, 342–345
Ergometer Testing
computerized, 10–17
work performance and, 10–17
Exercise
bedrest and, 91–98
blood lipids and, 332–341
compliance to, 332–341
complications of, 269–276, 277
discontinuation of, 115–120
dynamic, 77–84
group vs home, 190–195
hemodialysis and, 68–72
hormonal response to, 91–98
isometric, 253–258
maximal, 91–98
physical-activity habits, 190–195
static, 77–84
submaximal, 10–17, 68–72
Exercise Echocardiography
circuit weight training, 402–409

Exercise Physiology
myocardial infarction, 115–120
Exercise Prescription
arm and leg exercise, 551–555
hemodialysis, 177–189
model for, 177–189
physical-activity habits, 190–195
Exercise Program
coronary heart disease and, 130–135
health beliefs and, 130–135
Exercise Testing
cardiovascular responses, 253–258
clinical characteristics, 365–373
handrail supported, 324–331
ischemia and, 145–149
isosorbide dinitrate and, 239–252
left ventricular volume and, 29–36
myocardial infarction and, 115–120
obesity and, 358–364
oxygen consumption and, 324–331
physical therapy and, 269–276, 277
prediction of treadmill performance, 365–373
safety of, 269–276, 277
Exercise Therapy, 42–50
Exercise Training
apolipoproteins, 481–486
HDL-cholesterol, 481–486
left ventricular function, 278–284
physical-activity habits, 190–195

Fish Oils
preventive cardiology, 526–533
Frank-Starling Mechanism, 29–36
Functional Capacity
prediction of, 365–373

Harvard Alumni Activity Survey, 190–195
Health Beliefs
coronary heart disease, 130–135
exercise program, 130–135
Heart Rate
ambulatory measurements, 253–258
Hemodialysis
effects of exercise during, 68–72
exercise prescription and, 177–189
Hemodynamic Responses
cardiopulmonary resuscitation, 346–348
High-Density Lipoprotein Cholesterol
exercise effects, 332–341
Hormonal Response
bedrest and, 91–98
exercise and, 91–98
Hypercholesterolemia
lipid-lowering therapy, 220–233
Hypertension
cardiorespiratory response, 77–84
treatment with nisoldipine, 77–84
Hyperventilation
dyskinemia,

In the Literature, 175–176, 349–352, 476
Ischemia
coronary arteriography and, 145–149
diagnosis of, 145–149
isosorbide dinitrate and, 239–252
Isometric Exercise
cardiovascular responses, 253–258
CK-MB, 451–457
creatine kinase, 451–457
Isosorbide Dinitrate
exercise testing, 239–252

Left Ventricular Function
echocardiography, 278–284
exercise training, 278–284
training program, 518–524
Left Ventricular Volume
exercise testing and, 29–36
Lipid-Lowering Therapy
apolipoproteins, 221–222
cardiac rehabilitation clinics, 231–232
cholesterol, 221–222
clinical trials, 222–229
coronary heart disease, 221–222
lipoproteins, 221–222
National Heart, Lung and Blood Institute studies, 229–230
therapy recommendations, 230–231
Low-Density Lipoprotein Cholesterol
exercise effects, 332–341

Maximal Transrespiratory Pressures, 18–22
Medical Education, 42–50
Medical House Officers
dysrhythmia, 342–345
electrocardiographic monitoring, 342–345
Metabolic Responses
cardiopulmonary resuscitation, 346-348

definitions and concepts, 197–198
long-term adaptation, 199
myocardial infarction, 196–200
research directions, 199
Stress Testing
myocardial infarction and, 122–129
value of, 122–129
Symptomatic Responses
cardiopulmonary resuscitation, 346–348

Thallium Scintigraphy, 145–149
Training Program
left ventricular function, 518–524
radionuclide ventriculography, 518–524
Treadmill Performance
prediction of, 365–373

Virginia
cardiac rehabilitation in, 42–50

Work Performance
ergometer testing, 10–17
predictability of, 10–17
YMCA testing, 10–17

YMCA, 10–17
